

# Health and Safety Policy Quick Reference

## OUR GOAL

Zero accidents.  
Zero injuries.

We want a Health and Safety program that produces results that surpass the experience of organizations similar to ours.

Accident and illness prevention trumps operations.

To the greatest degree possible, NGC will provide all physical and mechanical facilities required for personal safety and health in keeping with the highest standards.

We find and eliminate unsafe working conditions and practices, control hazards, and comply with health and safety standards for each job.

NGC provides training for employees in good safety and health practices; we provide personal safety equipment; we develop and enforce health and safety rules.

NGC investigates every accident or incident immediately and thoroughly to find out what caused it. We take corrective action so that it won't happen again.

Safety is a shared responsibility. NGC accepts responsibility for health and safety leadership. Employees are responsible for following safe practices on every job.
